DETAILED ACTION

This office action is in response to the amendment, received 9/2/04. Claims 63, 65-68 and 70-75 are pending.

Claim Rejections - 35 USC § 102

Claims 63, 65-68 and 70-75 are/stand rejected under 35 U.S.C. 102 (a) as being anticipated by Ingham (USPN 5,844,079) for reasons of record which are restated below.

The claimed invention is drawn to a preparation comprising a sonic hedgehog polypeptide sequence in which the polypeptide is formulated for topical application to hair.

Ingham et al. teaches topical preparations comprising sonic hedgehog polypeptides encoded by hedgehog related genes, see e.g., for example, column 3. Ingham teaches the Shh polypeptide can comprise a fragment of at least 50, 100 or 150 amino acids in length within the N-terminal half thereof, see, e.g., for example, column 3. In addition, Ingham discloses hedgehog polypeptides which include Shh sequences corresponding approximately to the natural proteolytic fragments of the hedgehog proteins, such as from about Cys-24 through Glu-188, or from about Asn-189 through Ala-475 of the human Shh protein, or analogous fragments thereto, see, e.g., for example, column 3. Please note that nothing would preclude the use of the topical preparations taught by Ingham et al. as instantly claimed- i.e., as topical hair formulations. Therefore, the reference is deemed to anticipate the instant claims above.

Applicant's arguments were carefully considered but were not found persuasive.

Art Unit: 1654

Applicant contends that Ingham fails to teach the particular combination of a post-translationally modified hedgehog polypeptide formulated in a preparation for topical application. However, the examiner contends that Ingham teaches a hedgehog polypeptide which is post-translationally modified (see, e.g., for example, claim 26).

Claim Rejections - 35 USC § 103

Claims 63, 65-68 and 70-75 are/stand rejected under 35 U.S.C. 103 (a) as being unpatentable by Ingham (USPN 5,844,079) for reasons of record which are restated below.

Based upon the beneficial overall teachings provided by Ingham et al. with respect to hedgehog protein preparation, if not expressly taught, it would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to make result effective adjustments in conventional working parameters thereto (e.g., particular fraction sizes and modifications thereto) as a mere matter of judicious selection and routine optimization.

Thus, the claimed invention as a whole is *prima facie* obvious over the cited reference, especially in the absence of evidence to the contrary.

Applicant's arguments were carefully considered but were not found persuasive.

Applicant contends that Ingham fails to teach the benefits of the particular combinations of post-translational modifications, formulations, and mode of administration set forth in the pending claims. Further, applicant contends that the examiner has not provided any evidence that would have motivated one of skill in the art to arrive at applicants'invention. However, the examiner contends that Ingham teaches a hedgehog polypeptide which is post-translationally modified (see, e.g., for example, claim 26). Further, the examiner contends that with respect to

Art Unit: 1654

hedgehog protein preparation, if not expressly taught, it would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to make result effective adjustments in conventional working parameters thereto (e.g., particular fraction sizes and modifications thereto) as a mere matter of judicious selection and routine optimization.

Conclusion

All claims are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is 571-272-0971. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.

Art Unit: 1654

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bruce Campell, can be reached on 571-272-0974. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
